

## Constituents Overview Sheet

The **Nasdaq Clean Edge Green Energy™ Index (CELSTM)** is a modified market capitalization-weighted index designed to track the performance of companies that are manufacturers, developers, distributors, and/or installers of clean-energy technologies. Sub-sectors include advanced materials, energy intelligence, energy storage & conversion, and renewable electricity generation. The constituents of CELS are listed below.

*An alternate version of the index, the Nasdaq Clean Edge Green Energy Exclusions™ Index (CELSE™), incorporates an ESG screening methodology identified and applied by Morningstar Sustainalytics. The four constituents excluded via this screening process, and therefore not included in CELSE, are identified below with an asterisk before their company name.*
