

Constituents Overview Sheet

The **Nasdaq OMX Clean Edge Smart Grid Infrastructure™ Index (QGRD™)** is designed to act as a transparent and liquid benchmark for the smart grid and electric infrastructure sector. The Index includes companies that are primarily engaged and involved in electric grid; electric meters, devices, and networks; energy storage and management; connected mobility; and enabling software used by the smart grid and electric infrastructure sector (including both pure play companies focused on the smart grid sector and diversified multinationals with smart grid sector exposure). The constituents of QGRD are listed below.

*An alternate version of the index, the **Nasdaq OMX Clean Edge Smart Grid Infrastructure Exclusions™ Index (QGRDE™)**, incorporates an ESG screening methodology identified and applied by Morningstar Sustainalytics. The 10 constituents excluded via this screening process, and therefore not included in QGRDE, are identified below with an asterisk next to their company name.*
