

## Constituents Overview Sheet

The **Nasdaq Clean Edge Green Energy™ Index (CELS™)** is a modified market capitalization-weighted index designed to track the performance of companies that are manufacturers, developers, distributors, and/or installers of clean-energy technologies.

Sub-sectors include advanced materials, energy intelligence, energy storage & conversion, and renewable electricity generation.

| COMPANY                          | STOCK TICKER | SECTOR                                              | AT A GLANCE                                                                                                                     |
|----------------------------------|--------------|-----------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------|
| Acuity, Inc.                     | AYI          | Energy Intelligence ( <b>EI</b> )                   | LEDs and other efficient lighting products, energy control and building management systems                                      |
| Advanced Energy Industries, Inc. | AEIS         | Energy Storage & Conversion ( <b>ES&amp;C</b> )     | Power supplies and controllers                                                                                                  |
| Albemarle Corp.                  | ALB          | Advanced Materials ( <b>AM</b> )                    | Lithium for batteries                                                                                                           |
| Allegro MicroSystems, Inc.       | ALGM         | EI                                                  | Integrated circuits provider with a focus on vehicle electrification, power saving technologies, and green energy applications  |
| Ameresco, Inc.                   | AMRC         | EI + Renewable Electricity Generation ( <b>RE</b> ) | Renewable energy and energy efficiency systems design, implementation, and integration                                          |
| American Superconductor Corp.    | AMSC         | EI                                                  | Electronic control systems and superconductive wires for grid management/optimization; wind turbine designs and control systems |
| Array Technologies, Inc.         | ARRY         | RE                                                  | Ground-mounting systems for solar PV projects                                                                                   |
| Aspen Aerogels, Inc.             | ASPN         | ES&C + EI                                           | Insulation that prevents thermal runaway in Li-battery chemistries                                                              |
| Ballard Power Systems, Inc.      | BLDP         | ES&C                                                | Stationary and transportation fuel cells                                                                                        |
| Bloom Energy Corp.               | BE           | ES&C                                                | Stationary fuel cells                                                                                                           |

|                                             |      |           |                                                                                                                                                                      |
|---------------------------------------------|------|-----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Brookfield Renewable Partners L.P.          | BEP  | RE        | Owner of solar, wind, hydroelectric, and storage assets worldwide                                                                                                    |
| ChargePoint Holdings, Inc.                  | CHPT | ES&C      | EV charging network provider                                                                                                                                         |
| Clean Energy Fuels Corp.                    | CLNE | AM        | Delivers renewable natural gas as an alternative fuel for vehicle fleets                                                                                             |
| Clearway Energy, Inc.                       | CWEN | RE        | Owner/operator of utility-scale wind/solar and distributed solar projects in U.S.                                                                                    |
| Electrovaya, Inc.                           | ELVA | ES&C      | Lithium-ion batteries & systems for materials-handling electric vehicles and for electric transportation applications                                                |
| EnerSys                                     | ENS  | ES&C      | Stationary and transportation battery storage                                                                                                                        |
| Enovix Corp.                                | ENVX | ES&C      | Lithium-ion battery cells for industrial and consumer equipment                                                                                                      |
| Enphase Energy, Inc.                        | ENPH | ES&C      | Solar inverters, energy systems, and controls                                                                                                                        |
| Eos Energy Enterprises, Inc.                | EOSE | ES&C      | Provider of zinc battery storage for utility, commercial, and industrial applications                                                                                |
| EVgo, Inc.                                  | EVGO | ES&C      | EV-charging solutions for commercial, governmental, and retail applications                                                                                          |
| First Solar, Inc.                           | FSLR | RE        | Thin-film solar manufacturer and project developer                                                                                                                   |
| Fluence Energy, Inc.                        | FLNC | ES&C      | Provider of utility-scale and grid-edge energy storage systems (joint-venture of Siemens and AES) with a focus on integrating renewable electricity into power pools |
| Gevo, Inc.                                  | GEVO | AM        | Builds and operates renewable natural gas projects and licenses sustainable chemical technologies                                                                    |
| HA Sustainable Infrastructure Capital, Inc. | HASI | RE + EI   | REIT investing in solar and wind projects, energy-efficient buildings, and other sustainable developments                                                            |
| Itron, Inc.                                 | ITRI | EI        | Smart meters and metering infrastructure for utilities                                                                                                               |
| LSI Industries, Inc.                        | LYTS | EI        | LED lighting manufacturer                                                                                                                                            |
| Lucid Group, Inc.                           | LCID | ES&C      | EV manufacturer producing high-performance passenger cars                                                                                                            |
| Montauk Renewables, Inc.                    | MNTK | AM        | Producer of renewable natural gas (RNG) and biogas from landfill gas and agricultural waste                                                                          |
| MP Materials Corp.                          | MP   | AM        | Rare earth miner which owns and operates Mountain Pass in the Californian Mojave Desert                                                                              |
| Navitas Semiconductor Corp.                 | NVTS | EI + ES&C | Ultra-efficient gallium nitride (GaN) semiconductors enabling improved charging and higher power density                                                             |
| Nextracker, Inc.                            | NXT  | RE        | Provider of integrated solar tracking and software solutions for solar projects                                                                                      |
| ON Semiconductor Corp.                      | ON   | EI + ES&C | Power management conductors, inverters, and controls                                                                                                                 |
| Ormat Technologies, Inc.                    | ORA  | RE        | Geothermal power plants                                                                                                                                              |
| Plug Power, Inc.                            | PLUG | ES&C      | Hydrogen fuel cells, electrolyzers, and storage                                                                                                                      |
| Polestar Automotive Holding UK Plc          | PSNY | ES&C      | Design, development, and manufacture of electric vehicles                                                                                                            |
| Power Integrations, Inc.                    | POWI | EI + ES&C | Power conversion integrated circuits                                                                                                                                 |
| ReNew Energy Global Plc                     | RNW  | RE        | Builder and operator of wind and solar generating facilities in India                                                                                                |
| Rivian Automotive, Inc.                     | RIVN | ES&C      | Design, development, and manufacture of EVs with a focus on trucks                                                                                                   |
| Shoals Technologies Group, Inc.             | SHLS | RE        | Provider of electrical balance of system technologies for PV generation                                                                                              |

|                                         |      |           |                                                                                                                                                             |
|-----------------------------------------|------|-----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Sigma Lithium Corp.                     | SGML | AM        | Canada-based producer of lithium for energy storage                                                                                                         |
| Sociedad Química y Minera de Chile S.A. | SQM  | AM        | Chile-based producer of lithium for energy storage                                                                                                          |
| SolarEdge Technologies, Inc.            | SEDG | EI        | Solar PV inverters                                                                                                                                          |
| Sunrun, Inc.                            | RUN  | RE + ES&C | Residential solar and storage developer                                                                                                                     |
| Tesla, Inc.                             | TSLA | ES&C + RE | Global EV leader with additional activities in residential and commercial battery storage and solar power systems                                           |
| Universal Display Corp.                 | OLED | EI        | Organic LED lighting and displays                                                                                                                           |
| Vicor Corp.                             | VICR | EI + ES&C | Power system converters, regulators, and related systems                                                                                                    |
| Willdan Group, Inc.                     | WLDN | EI        | Energy efficiency and energy management technologies and consulting services                                                                                |
| Wolfspeed, Inc.                         | WOLF | EI + ES&C | Semiconductor company producing silicon carbide and gallium nitride (GaN) technologies for renewables, EVs, storage, and other electrification applications |
| XPLR Infrastructure, L.P.               | XIFR | RE        | Owner of utility-scale solar and wind plants and one of the leading developers of RE deployments                                                            |
